

webMethods.io B2B

Accelerate the speed of doing business

Simplify the complexity of how you exchange your B2B documents in the cloud and avoid infrastructure headaches and costs.

upSpring.io is built on webMethods.io. With webMethods.io B2B, built on the industry-leading webMethods Trading Networks, you can quickly transmit electronic business

documents—like purchase orders, invoices and shipping notices—with customers, distributors and trading partners without any hardware investment, maintenance or upgrades.

Our middleware enterprise integration strategies will steer your organization to new levels of digital transformation. Don't expect traditional "system integrators" to understand your middleware needs. Integration is what we do.

Pay as you grow

Software AG's webMethods.io B2B is a consumption-based B2B document translation and transmission service that makes it easy to set up and communicate flexibly and reliably with your trading partners. As a pure Software-as-a-Service (SaaS) offering, you can forget about costly and time-consuming hardware and infrastructure investments, implementation and operations.

Everything's done in the cloud, so you avoid all the headaches and costs of setting up and maintaining a B2B network. Let us take care of those details while you simply:

- Onboard trading partners of any size in minutes
- Exchange business documents conveniently in the cloud
- Centrally manage important partner details, like contacts Integrate B2B documents directly with your back-end systems for fast processing
- Send any number of documents and grow to connect any number of partners
- Leverage an out-of-the-box store of over 14,000 document types

Key Benefits

- Low TCO, no operational headaches
- Fast setup and partner onboarding
- Utilize AS2 and HTTP transport protocols
- Secure transmission and translation for Advanced Shipping
- Notices (ASN), invoices, purchase orders, proof-of-delivery, quotes and more
- Greater control with end-to-end visibility of your partner network
- Peace of mind—count on the reliable connectivity of webMethods, the industry-leading hybrid integration platform
- Real-time-electronic document exchange through EDI (UNEDIFACT, ANSI X12, EANCOM, ODETTE, UCS, VICS, VDA, TRADACOMS)

Features

A fresh look at partner management

webMethods.io B2B introduces a UI that dramatically improves the user experience. Expect increased usability and productivity through increased clarity, intuitive navigations and fewer clicks.

Onboard partners faster and improve how you manage them by using a shared administrative infrastructure. For each partner, you can define:

- ✓ Document routing information
- ✓ Processing information
- ✓ Contact details

Define and store inbound and outbound communication channels to automate and manage your partnerships, and be sure documents are sent and received securely.

Customize document types

Use webMethods.io B2B to quickly customize document types for support of priority partners who create their own versions of document standards.

Document creation, parsing & validation

Save time with, deep out-of-the-box EDI support for UNEDIFACT X12 (4010 and 5010) EANCOM, ODETTE, UCS, VICS, VDA, and TRADACOMS document types. Document validation helps you assure data accuracy and high quality. Ensure the data you send and receive is correct and reliable and that your documents are delivered and received securely with your trading partners.

Reusable rules

Reduce errors and inefficiencies by implementing consistent and reusable document processing rules. Processing rules provide flexibility in your partner communications and ensure consistent and reliable data.

Back-end integration

Quickly tie your B2B processes to your back-end systems and orchestrate your B2B processes via webMethods.io Integration.

Security and encryption

webMethods.io B2B ensures transaction security through partner certificates plus SSL support for Inbound and Outbound Channels, including AS2. Automatic encryption/decryption adds an additional layer of assurance.

Real-time exchange

With webMethods.io B2B, you can work in real time with your trading partners, eliminating costly delays and speeding up the way you do business.

Operational visibility

Track and manage B2B transactions. Gain complete end-to-end visibility into B2B transactions across your entire trading network. Instantly see the status of your transactions.

Message repair & resubmit

When a transaction problem happens, fix it fast. With webMethods.io B2B, you can locate the problem's source by drilling down into transaction data, including message header and routing information as well as the message payload itself. Then, take corrective or preventive action as needed.

You can easily update the transaction payload and resubmit. This saves you from having to wait on your partners to fix an issue on their side and then resend the message.

Activity logs

You need a record of the information that flows through your B2B gateway whether it is for the daily management of your business or to support security or compliance initiatives.

With webMethods.io B2B, you can capture all of your message transaction data in a centralized audit log and access the log easily anytime.
